# Trend. Q4 2023 Trends in Lodging Industry

With the steady rise in foreign tourists visiting Korea, the accommodation sector saw overall improvement in Q4 2023 compared to Q4 2022. Hotels, resorts, and motels all exhibited growth, with notable increases in RevPAR for 1- and 2-star hotels and a significant surge of 30.9% in RevPAR for motels in the Jeju region. However, despite a nationwide increase in ADR, room occupancy rates for pensions significantly decreased, resulting in a 2.1% decrease in RevPAR compared to Q4 of the previous year. Especially in Jeju, RevPAR decreased by 10.8% compared to Q4 of the previous year, attributed to the revenge travel phenomenon, where tourists opt for trips to Japan instead of Jeju.

Seoul showed the highest performance growth compared to the same quarter last year. ADR, OCC, and RevPAR increased for 1- to 4-star hotels and motels in Seoul, with motels recording a notable 13.8% increase in RevPAR. Conversely, Gangwon saw RevPAR decline across all hotel ratings, notably by 10.7% for 4-star hotels. Notably, Jeju experienced significant motel performance growth while hotel and pension performance declined, requiring detailed analysis for improvement.

## Lodging Business Current Index

### Compared to Q4 2022, hotels improved ADR/OCC, while motels declined

- Year-over-year, hotels improved in both ADR and OCC, while motels declined.
- With rising prices in the food and dining industry, customers are increasingly opting for hotels over motels for better value satisfaction.

#### Current Index : Evaluate current compared to the same period last year

\*Note:  $50 \leq \text{Business Index} \leq 150$ , If the index is above (below) 100, more (less) companies cognize that the current quarter's business conditions are improved than the same quarter of last year.

\*Source : Own survey results (refer to Appendix 01)

## Lodging Business Future Index

### Both hotels and motels are expected to decline in performance in Q1 2024

- ADR and OCC for both sectors are projected to see a significant drop compared to Q4.
- Anticipated decline attributed to the end of peak tourism in Q3 and special year-end events.

#### Future Index : Forecast for next quarter compare to current

\*Note:  $50 \leq \text{Business Index} \leq 150$ , If the index is above (below) 100, more (less) companies cognize that the current quarter's business conditions are improved than the same quarter of last year.

\*Source : Own survey results (refer to Appendix 01)

Changes in Operational Status by Property Type

**Compared to Q4 2022, hotels/resorts/motels all saw performance increases**

- Increased demand for hotels (OCC) led to a rise in ADR, resulting in a growth in RevPAR compared to Q4 of the previous year.
- Despite a decrease in demand for resorts, an increase in ADR led to growth in RevPAR compared to Q4 of the previous year.
- Although ADR for pensions increased compared to Q4 2022, a decrease in OCC resulted in a 2.1% decrease in RevPAR compared to the same period last year.

**Compared to Q3 2023, motels improved in performance**

- Hotels, resorts, and pensions experienced a decrease in RevPAR compared to Q3. Particularly, resorts saw a significant decline of 21.2% in RevPAR.

**Changes in ADR/OCC/RevPAR by property type(2022.Q4 ~ 2023.Q4 & 2023.7~12)**

# 1. Hotel

## Hotel Operating Status by Region

### The performance change of hotels varied by region compared to Q4 2022

- Compared to Q4 2022, 1- to 4-star hotels in Seoul saw overall performance growth, notably with 4-star hotels achieving a RevPAR of 16.9 million won.
- Jeju and Gangwon experienced a decline in RevPAR for 1- to 4-star hotels compared to Q4 2022, possibly due to increased domestic tourism abroad.

### Excluding Seoul, hotel performance declined in most regions from Q3 2023

- In Seoul, 1-4 star hotels saw RevPAR rise, as ADR growth offset OCC decline.
- Except for 1- to 4-star hotels in Seoul, 3-star hotels in Chungcheong, and 1- to 2-star hotels in Gyeonggi, hotels experienced a decline in RevPAR. The region with the largest decrease was Gangwon.

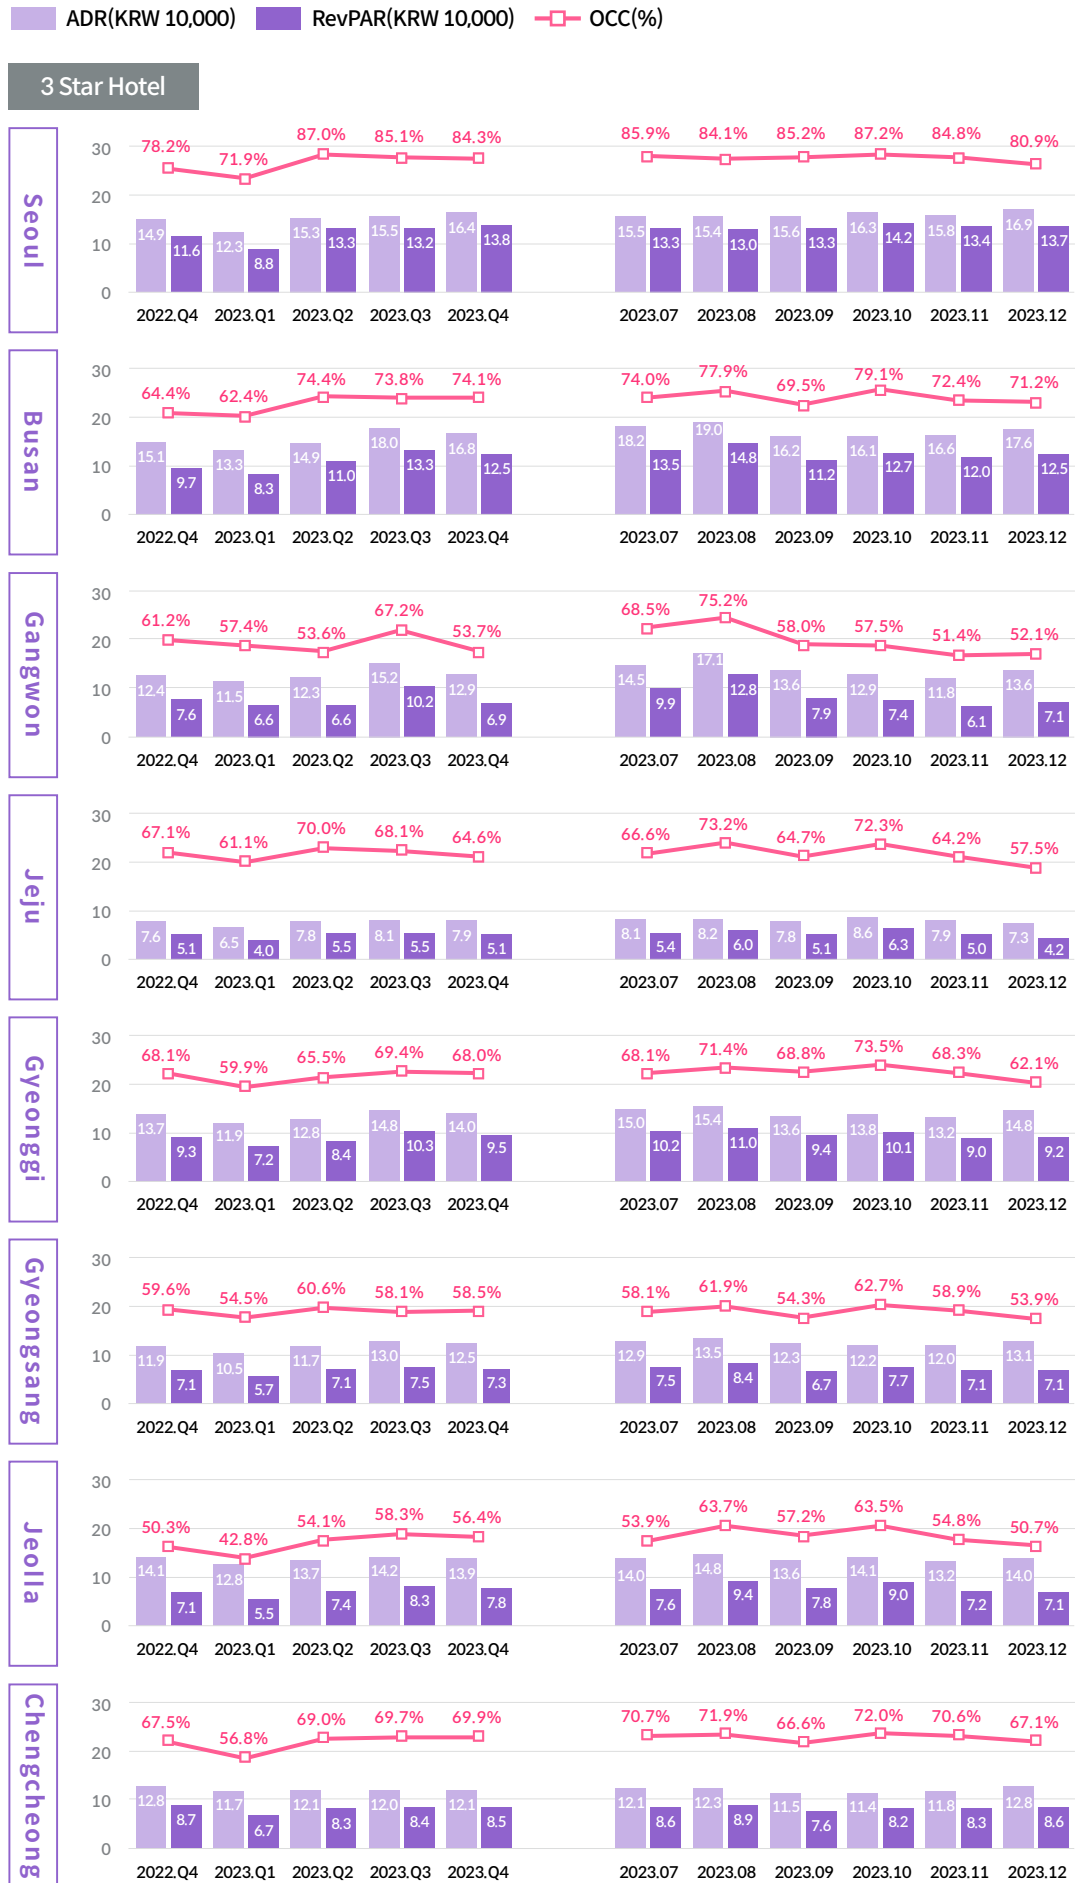

### Changes in ADR/OCC/RevPAR of hotels and resorts

\*Note1: Data calculated with less than 5 samples are not provided because statistical significance is deemed insufficient.

\*Note2 : Gyeonggi includes Gyeonggi-do/Incheon, Gyeongnam includes Gyeongsangnam-do/Ulsan, Gyeongbuk includes Gyeongsangbuk-do/Daegu, Jeolla includes Jeollanam-do/Jeollabuk-do/Gwangju, and Chungcheong includes Chungcheongnam-do/Chungcheongbuk-do/Daejeon/Sejong.

# 2. Motel

## Motel Operating Status by Region

### National Performance Growth Compared to the Same Quarter of 2022

- Key metrics that dropped in Q1 2023 steadily rose, exceeding Q1 2022 levels by Q4.
- Rising expenses, like fees and utilities, boosted nationwide ADR.
- In Seoul, Jeju, and the Gyeongnam area, where RevPAR surged in Q4 2023 compared to Q4 2022, OCC growth stands out prominently.

### Performance growth in the capital region compared to Q3 2023

- In Seoul, OCC rebounded from 78.4% in Q3 2023 to 87.5% in Q4, driving a 13.8% RevPAR increase. Gyeonggi motels saw a 10.4% RevPAR growth.
- In Busan, OCC fell from 76.3% in Q3 to 72.1% in Q4, leading to a 3% drop in RevPAR.

### Changes in ADR/OCC/RevPAR of motels

# 3. Pension

## Pension Operating Status by Region

### Nationally, ADR rose from Q2 2022, but OCC fell

- Jeju, Gyeonggi, Gyeongnam, and Chungcheong regions saw RevPAR decline compared to last year, as ADR growth failed to offset OCC decline.
- In particular, Jeju saw a sharp OCC decline from the previous year ('22.Q4 vs. '23.Q4 Jeju OCC change: -13%), leading to a 10.8% RevPAR decrease. This is attributed to increased demand for travel to Japan instead of Jeju due to the yen depreciation.
- Busan, Gangwon, Gyeongbuk, and Jeolla saw RevPAR rise.

### After summer ended, performance declined from Q3 2023

- All regions saw pensions ADR, OCC, and RevPAR drop from Q3.

# Issue. Analysis of the inbound tourism in 2023

Recent trends show bustling activity in areas like Myeongdong and large shopping malls in Seoul's Jung-gu district, as the reopening of air travel routes has led to a surge in foreign tourists visiting Korea. By November 2023, the number of foreign tourists reached approximately 10 million, marking a 276% increase compared to the same period in 2022. However, this figure is still only at 62.3% compared to the pre-pandemic levels of 2019, indicating a partial recovery primarily due to the slow return of Chinese tourists.

In this issue, we examine the trends in the inbound tourism market from 2019 to 2023. Firstly, through comparative analysis of interest in Korean culture by country, it's evident that specific aspects of Korean culture have garnered increased interest from different nations. Secondly, it's observed that foreign visitors still prefer destinations within the Seoul metropolitan area. Thirdly, per capita spending by foreign tourists has increased, with a higher proportion allocated to accommodations and food & beverage establishments, particularly evident in significant spending at large shopping malls and other accommodations.

Analysis of responses from accommodation providers reveals a more pronounced increase in foreign tourist arrivals at hotels compared to motels. Furthermore, there's a positive outlook for the growth of foreign tourist arrivals in 2024.

## 1. Inbound tourism status

### Foreign tourist trend

#### Foreign tourist arrivals are steadily rising, but full recovery is pending

- By November 2023, foreign tourist arrivals in Korea reached 9,995,040, a 276% increase compared to the previous year, but only 62.3% compared to 2019.

#### Trend in the number of inbound foreign tourists to Korea

\*Source: Korea Tourism DataLab

#### Japanese/American tourists recover swiftly, while Chinese tourists lag behind

- Inbound tourists from Jan to Nov 2023: Japan, China, USA. The USA shows a remarkable recovery rate of 97% compared to 2019, while China lags behind at 29%.
- Despite China reopening group tours, economic downturn and a rise in individual travelers diminish the expected impact.

#### Changes in the number of foreign tourists by nationality

\*Source: Korea Tourism DataLab

Analysis of Interest in Travel to Korea

**Japan has shown interest in 'fashion'/'cafes', China in 'food', and U.S. in 'K-pop'**

- Analysis of Korean travel-related terms on social media from 2019 to 2023 shows heightened interest in specific Korean cultures by country:
  - Japan: While interest in Korean cosmetics decreased, interest in fashion and cafes grew.
  - China: Interest in Korean food diversified and increased.
  - U.S.: K-pop-related keywords ranked high in 2023, suggesting K-pop contributed to rapid recovery among American tourists.

**2019 vs. 2023 SNS Keywords for Korea Travel by Country**

Rank	Japan		China		U.S.	
	2019	2023	2019	2023	2019	2023
1	Korea	Seoul	Travel to Korea	Restaurant exploration	Korea	Seoul

\*Note: Comparison results are based on researcher-defined criteria post-data collection.

Changes in Foreign Tourists' Visitation Destinations

**The concentration of foreign tourists in the metropolitan area persists.**

- Despite various changes in the tourism industry due to the COVID-19 pandemic, foreign tourists still show a preference for tourism centered around the metropolitan area.
  - In 2023, the proportion of foreign tourists visiting the metropolitan area stood at 68%, representing a 3%p increase compared to 2019.
- Efforts such as integrated operations and marketing tailored to each regional area are needed to attract foreign tourists to visit various regions

**Trends in foreign tourist visits to regions**

Rank	2019		2023	
1	Seoul	40%	Seoul	34%
2	Gyeonggi	13%	Incheon	21%
3	Incheon	12%	Gyeonggi	13%
4	Jeju	8%	Busan	8%
5	Busan	8%	Jeju	5%
6	Gyeongnam	3%	Gyeongnam	4%
7	Jeonnam	3%	Chungnam	2%

\*Source: Korea Tourism DataLab

Changes in foreign tourist spending patterns

**Per capita tourism income up, more spent on lodging and dining**

- In Jan-Nov 2023, foreign tourist numbers hit 62.3% of 2019 levels, but per capita tourism revenue surged, reaching about 80% of pre-pandemic levels.
- The increase in per capita tourism revenue is attributed largely to inflationary pressures
- Comparing industry expenditure between 2019 and 2023, shopping decreased slightly while accommodation and food spending increased.

**Changes in tourism revenue**

**2019 vs. 2023 Foreign spending by sector**

\*Source: Korea Tourism DataLab

\*Note: Tourism revenue compared for Jan to Nov, while spending analyzed for Jan to Dec.

**More large shopping mall spending, less on hotels**

- Duty-free spending down sharply (from 39.8% in '19 to 20.2% in '23), while large shopping mall shopping surged (from 51.7% in '19 to 70.8% in '23).
- Major large shopping malls have become shopping destinations for MZ generation foreign tourists, leading to a significant increase in foreign sales.
- Decrease in Chinese tourists and changing shopping habits impact duty-free spending.
- Hotel spending share slightly decreased (from 74.2% in '19 to 70.8% in '23), while other accommodations' share slightly increased (from 51.7% in '19 to 70.8% in '23).
- During the pandemic, the surge in hotel ADR led to increased accommodation expenses, prompting a preference for relatively cheaper lodging options.

**Sectoral trends in foreign tourist spending**

\*Source: Korea Tourism DataLab

\*Note: "Other accommodations" include motels, guesthouses, inns, and homestays.

## 2. Survey Results for Suppliers

While we could assess changes in the inbound tourism market based on tourism data, we needed more information to capture firsthand insights from the industry. Hence, we conducted a survey in the fourth quarter to gather diverse opinions on foreign guest stays.

The survey collected responses from 204 hotels on six questions regarding the current status and outlook of foreign guest stays, and from 280 motels on four questions.

### Hotel vs. Motel foreign guest comparison

#### The increase in foreign guests is more pronounced in hotels than in motels

- For the question 'Did the number of foreign guests increase compared to last year?', 70% of hotels and 17% of motels answered affirmatively..

#### Response to 'Did the number of foreign guests increase compared to last year?'

\*Source: Online survey conducted on 204 domestic hotel owners and 280 motel owners

\*Note: "N/A" indicates that there were no foreign guests at the establishment.

### Regional comparison of foreign guest change

#### Both hotels and motels rank Seoul at the top in terms of regions

- In hotels, Seoul (94%), Gyeongbuk (89%), Busan (83%) saw the highest foreign guest increases. In motels, it was Seoul (44%), Jeju (43%), Gyeongbuk (36%).
- The increase in foreign guest numbers likely positively influenced the high YoY RevPAR growth rates in motels in Seoul and Jeju regions.
  - Travel agencies are increasingly buying boutique motels instead of high ADR hotels, packaging them into travel deals to attract foreign tourists.

#### Regional response rate to 'Increased foreign guest stays from last year?'

\*Source: Online survey conducted on 204 domestic hotel owners and 280 motel owners

Status of foreign guest occupancy by nationality

**Hotels: diverse guests. Motels: mainly Chinese tourists**

- Hotels saw most visitors from China (31%), Japan (24%), Taiwan (13%), while motels' top visitors were from China (47%), Japan (13%), Vietnam (12%).
- In the 'Other' responses for hotels, various countries from Europe, Southeast Asia, and the Middle East were predominantly included.
- 47% of motel respondents cited Chinese guests as the predominant visitors.

**Response to 'Which nationality of foreign guests had the highest numbers of visitors?'**

\*Source: Online survey conducted on 204 domestic hotel owners and 280 motel owners

Booking channels for foreign guest stays

**In hotels, global OTAs dominate the reservation share**

- In response to the question about booking channels used by foreign guests, global OTAs such as Agoda (42%) and Booking.com (20%) dominate.
- The influence of the Top 4 companies (Booking Holdings, Expedia Group, Airbnb, Trip.com), which collectively hold a 97% market share worldwide, remains strong.

**Response to 'Which booking channel did foreign guests use the most?'**

\*Source: Online survey conducted on 204 domestic hotel owners and 280 motel owners

Outlook of Foreign guest

**Hotels and motels expect more foreign guests in 2024 compared to 2023**

- An upward trend in foreign visitor arrivals is expected to continue into 2024.
  - We anticipate efforts to reach the government's 20 million foreign tourist target in 2024 will yield positive results.
- Motels have lower expectations for foreign guest increases compared to hotels.

**2024 Foreign guest outlook vs 2023**

※ 50 ≤ Business Index ≤ 150, If the index is above (below) 100, more (less) companies cognize that the current quarter's business conditions are improved than the same quarter of last year.

\*Source: Online survey conducted on 204 domestic hotel owners and 280 motel owners

# Appendix 01. Data Acquisition & Analysis

## 1. Purpose

- To comprehensively analyze the current and future economic conditions of the domestic lodging industry and provide market information to various stakeholders, the report identifies key indicators of the lodging industry, such as ADR, OCC, and RevPAR, for the hotel, motel, and pension categories only.

## 2. Methods of Data Acquisition & Analysis Methods

- Data Sources : Survey and Yanolja Platform Data
- Lodging Industry Trends Survey
  - Subject : 200 hotels and 249 motels (\*The sample size is determined considering the requirements for the survey)
  - Period : July 3, 2023 ~ July 14, 2023
  - Contents

Category	Contents
Basic Information	Company name, location, number of rooms, business period, availability of facilities, etc.
OCC	October, 2023~December, 2023
Current Business Index	OCC : evaluate the changes in 2023.Q4 compared to 2022.Q4 ADR : evaluate the changes in 2023.Q4 compared to 2022.Q4
Future Business Index	OCC : assume the changes in 2024.Q1 compared to 2023.Q4 ADR : assume the changes in 2024.Q1 compared to 2023.Q4

- Lodging Business Index
  - Based on the Bank of Korea's Customer Sentiment Index calculation method, but using a 3-point scale.

$$\text{Lodging Business Index} = \left[ \frac{(\# \text{ of response to improving} \times 0.5 - \# \text{ of response to worsening} \times 0.5)}{\# \text{ of total valid responses}} \times 100 \right] + 100$$

\*50 ≤ Business Index ≤ 150, If the index is above (below) 100, more (less) companies recognize that the current quarter's business conditions are improved than the same quarter of last year.

- Methods for Calculating Key Indicators
  - ADR = Total amount of transactions by the company in the month(quarter) ÷ Total number of bookings by the company in the month(quarter)
  - OCC
    - 1) Hotel : Use of Yanolja internal data and survey results
    - 2) Motel : Use survey results
    - 3) Pension : Use of Yanolja internal data,  
OCC = 1 - (Number of rooms remaining as of check-in data ÷ Total numbers of rooms)
  - RevPAR = ADR X OCC

# Appendix 02. Lodging Industry Trends Data

※ Statistical data is not provided if the sample size is less than 5, as it is deemed insufficient to ensure the reliability of statistical analysis.
